Did you know??

that **Reverse-911 calls** require VOICE ACTIVATION before the message is broadcast? Also, there is a LAG TIME of 15-20 seconds before the message is started. Do not hang up until you’ve heard the entire recorded message!!

that the **new RB Emergency Disaster Alert System** is set up to contact you **personally** to tell you about a pending emergency situation? Be sure you are on the Alert List by contacting your Neighborhood Watch person named above.
